FEATURES

- Centralised Management in a single rack solution
- Multiple I/O module options available in a single rack
- 12 slot chassis unit in compact 4RU 19" rack spacing
- 1 additional slot available for optional SNMP Management Module
- Alarm extension relays
- Hot-Swap for all modules and power supplies
- SNMP Remote Management
- Cost Effective Solution to multiple interface requirements

The MetroRack has 12 available slots to mix and match multiple cards from Metrodata's range of I/O modules. These include Interface conversion, Fibre conversion and LAN extenders. Redundant AC powers supplies offer resilience whilst a DC PSU option adds a greater level of MTBF. The MetroRack has SNMP management capability and can be accessed via systems using MIB-2 and traps.
